Demonstration of Proposed Features

Date: 1 November 2026 | Team ID: Not provided — enter the official assigned Team ID before submission | Project: F1 Race Intelligence: Formula 1 Performance Analytics using Tableau

Feature tracking

Tableau story publication — Status: Published link supplied; verify signed-out access. Demonstrate: Yes after actual rehearsal.

GitHub Pages website — Status: Published link supplied. Demonstrate: Yes after checking Tableau navigation and mobile layout.

Five-sheet workbook profile — Status: Source workbook inspected. Demonstrate: show workbook/data profile.

Business-question mapping — Status: documented. Demonstrate: explain each actual chart and its decision use.

Data-quality notes — Status: source-level profiling completed. Demonstrate: show counts and missing-value caveats.

Narrated video and public Drive link — Status: Pending until recording/upload is complete. Demonstrate: No until completed.

Snowflake implementation — Status: Not verified / proposed only. Demonstrate: No; do not claim deployment.

Implementation summary

Implemented / available artifacts: published Tableau Story1 URL and GitHub Pages website URL (verify access before demo). Pending evidence: video recording, public Drive link, screenshots of actual views and exact Tableau chart inventory. Snowflake deployment is not counted as implemented.
