Project Demo Planning

Date: 1 November 2026 | Team ID: Not provided — enter the official assigned Team ID before submission | Project: F1 Race Intelligence: Formula 1 Performance Analytics using Tableau

Demo plan

1. Introduction and problem statement · 0.5 min · Sudhanshu Singh: introduce goal and personas.

2. Dataset and data quality · 1 min · Sudhanshu Singh: show five sheets, row counts and missing-value caveats.

3. Tableau dashboard/story · 3·4 min · Sudhanshu Singh: show each actual visual, explain question, axes, pattern and caveat.

4. Website and repository · 1 min · Sudhanshu Singh: open GitHub Pages, follow Tableau link and show repository README.

5. Conclusion and limitations · 0.5 min · Sudhanshu Singh: summarize contribution and future work.

6. Questions · 1 min · Sudhanshu Singh: answer using evidence; distinguish implemented features from proposed Snowflake/live data.

Demo flow summary

Introduction → problem/personas → data profile → Tableau story visual-by-visual → website/repository → limitations/future scope → Q&A.

Before recording: close private tabs, confirm browser zoom, open the story at the first relevant view, test microphone/audio, and ensure all URLs work while signed out.
